Ronnie: TCEQ would like to determine if the attached (below) news release is still something we are working on? I was under impression (as I believe Michelle Havelka at TCEQ was) that sampling of private wells was off the table. Maybe not?

Can you please talk to Kelly Cook about this.

Thanks.

Mike-

I can I find out who is working this on EPA's side:

Residential Wells: EPA is developing a plan for sampling residential wells, and is coordinating with TCEQ to establish several locations where residents can bring water samples from their wells to be tested.
